WHMIS QUIZ (2015)

A score of 70% or better is required to successfully complete your WHMIS training.

1. Which word correctly completes the phrase: Workplace Hazardous Materials _____ System?

- Inventory
- Information
- In-house

2. Where can you get further information regarding the hazardous material?

- Transport of Dangerous Goods papers
- Ask your Regional Safety Officer
- Material Safety Data Sheet/Safety Data Sheets

3. What is not one of the key elements of WHMIS 2015:

- Hazard identification & product classifications
- Labelling
- Supplier education and training

4. Why is it important for you to be trained in WHMIS

- To get your work done faster
- To have information to protect your health and safety
- To serve your customer better

5. WHMIS Regulations apply mainly to the:

- Trucks and trains transporting hazardous materials
- Stores where hazardous materials are sold to the public
- Workplace where hazardous materials are used

6. The purpose of a WHMIS label is to:

- Tell consumers how many items are in the box
- Alert workers to important safety information and potential hazards
- Help Revenue Canada track the employer's profits

7. The MSDS/SDS for a hazardous material must be:

- Readily available to anyone using the hazardous material
- Supplied by the purchaser of the hazardous material
- Routinely updated every year.

8. The MSDS/SDS does NOT need to include:

- Information about first aid and firefighting procedures
- The name of the shipping company or deliverer
- The name of the supplier or manufacturer

9. WHMIS 2015 has categories within each hazard class, which are assigned a number based on the severity of the hazard.

- The lower the number, the greater the degree of severity
- The higher the number, the greater the degree of severity
- The number is irrelevant to how a worker interacts with the chemical

10. WHMIS 2015 requires SDS to be updated every:

- 6 months
- 3 years
- Only when significant new data becomes available

11. The main responsibility for classifying products is up to the:

- Ministry of Consumer and Corporate Affairs
- Supplier
- Worker

12. Workplace labels on containers for on-site use:

- Must include a list of hazardous ingredients
- Must include a product identifier and precautionary statements
- Are unnecessary, if the container is WHMIS approved

13. You are told to clean the floor with liquid from a drum. The supplier label has been torn off. What should you do?

- Not work with the liquid; tell your supervisor immediately about the missing label.
- Put gloves on "just in case."
- Clean the floor as you were told to do.

14. This WHMIS hazard symbol corresponds to the following classes:

- Flammable material
- Oxidizing material
- Biohazardous infectious material

15. This WHMIS hazard symbol corresponds to:

- Dangerously reactive material
- Flammable material
- Health hazards such as skin irritation or sensitization and eye irritation

16. This WHMIS hazard symbol corresponds to:

- Biohazardous infectious material
- Oxidizing material
- Corrosive material

17. This WHMIS hazard symbol corresponds to:

- Flammable material
- Products that cause chronic health effects and with targeted health effects
- Materials causing other toxic effects

18. This WHMIS hazard symbol corresponds to:

- Oxidizing material
- Gases under pressure
- Products with chronic health effects

19. This WHMIS hazard symbol corresponds to:

- Biohazardous infectious material
- Self-reactive substances and mixtures
- Corrosive material

20. This WHMIS hazard symbol corresponds to:

- Biohazardous infectious material
- Materials causing acute toxicity
- Flammable material

21. This WHMIS hazard symbol corresponds to:

- Cause harmful effects after repeated exposure
- Cause birth defects, cancer or allergies
- Unstable materials that can cause or increase the intensity of a fire

22. This WHMIS hazard symbol corresponds to:

- Oxidizing material that may make it easier for other Materials to burn
- Can cause frostbite on contact
- All have a distinctive odour
